DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the specific specie of claim 18 in the reply filed on 2/26/07 is acknowledged.
2. Claims 3-6, 9-12, 14, 15, 17 and 10-29 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/26/07.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 2, 7, 8, 13, 16 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear with what the silicon containing material should be capable of reacting.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1, 2, 7, 8, 13, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Ray (US Patent NO 6,586,109) or Richardson (US Patent No 4,529,378) in combination with Abbot et al (US 3,860,709), Endy (US Patent No 4,282,366) and Isquith et al (US Patent No 3,730,701).

Ray and Richardson both teach that treatment wood to provide fire retardant properties was conventional in the art.

Abbot et al, Endy and Isquith et al teach that claimed alkoxysilane was a known antimicrobial agent. Endy and Isquith et al teach that it was known to apply this agent to cellulose materials such wood.

It would have been obvious to an ordinary artisan at the time the invention was made to apply both known treatment agents to provide flame retardant and antimicrobial properties to wood with reasonable expectation of adequate results.

Response to Arguments

8. Applicant's arguments filed with respect to the rejection made under 35 USC 112(2) have been fully considered but they are not persuasive for the reasons of the record. It is noted that the applicants have not provided separate reasoning to rebut the

referenced rejection. The applicants relied on the arguments filed with respect to the rejection made under 35 USC 112(1). The applicants state that the silicon containing material can react to form polymeric network or can react with functional surface. However, the claims do not describe such. Moreover, the specification fails to teach such. The applicants' arguments are not persuasive because the claims do not clearly recite what is claimed.

New rejection under 35 USC 103 is added to address the specifically elected species.
